

# One Health EJP Nextflow workshop Oslo, Norway, 10-11th Oct 2019

Are you analysing sequencing data? Do you want your analyses to run faster and be more reproducible? The Nextflow workflow language might just be for you! Join us in Oslo, for a 2-day workshop on Nextflow!

## Who is this workshop for:

- Anybody working on analysing sequencing data at an EJP institution. Priority will be given to people working in the ORION or COHESIVE projects
- Participants should have a working knowledge of the linux command line, and have independently performed genomics analyses before. No prior Nextflow experience is expected or required.

## What is this workshop about:

- The Nextflow workflow language ([nextflow.io](https://nextflow.io)) enables people to make portable, reproducible and scalable genomics analyses
- The workshop is given by the Nextflow developers, and includes talks, demonstrations and practical sessions. The aim is that participants after the workshop should be able to develop their own workflows
- The workshop is co-organised by FOHM and NVI, via the ORION OHEJP project. This workshop is part of the OHEJP training programme.

## Practical information:

- Sign up here: <https://www.folkhelsemyndigheten.se/konf191010>
- Signup deadline: September 11th, 2019
- Workshop is free, participants must pay their own travel/accomodation
