

Strategic Research and Innovation Agenda

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No. 773830

OUR LEGACY

Attaining sustainability of the main outcomes and impacts of the One Health EJP to ensure the legacy of our work.

Broadening the scope of One Health and helping to consolidate an aligned One Health collaboration among European stakeholders responsible for public health, animal health and the environment for future initiatives.

STRATEGIC RESEARCH AND INNOVATION AGENDA PURPOSE

We highlight how the [One Health EJP](#) has adopted an interdisciplinary, integrative, and international approach to One Health for disease prevention, detection, and control across Europe. The success of the One Health EJP has depended on having mechanisms in place to ensure that the project outputs and outcomes are available to the scientific community, the authorities and policy makers to encourage their wider uptake and implementation across sectors.

The vision and mission of the Strategic Research and Innovation Agenda (SRIA) attains to fully implementing the One Health scope, and consolidating a European One Health network. This network will facilitate the alignment of surveillance, laboratory procedures, risk assessment methodologies and intervention approaches across sectors and countries to benefit the health of animals, humans, and the environment.

The SRIA also provides an update on the specific One Health EJP objectives, previously presented in the [Strategic Research Agenda in 2019](#), to meet the present and future challenges and needs. New objectives related to the UN Sustainable Development Goals are documented in the SRIA, which emphasises the importance of One Health EJP activities in relation to international aims.

ONE HEALTH EJP PROJECT OUTCOMES

A key section of the SRIA includes the expected impacts of the One Health EJP, through the uptake and application of One Health EJP tools and solutions at the national, European, and international level. We share a selection of the [project outcomes](#) aligned to the integrative strategy matrix that was developed to meet the needs of key stakeholders. This approach facilitates the uptake of the One Health EJP derived outputs and outcomes for future activities.

SUSTAINABILITY

Finally, we share the Sustainability Plan for 2021-2030. This plan recommends actions that will result in maintaining major outcomes of the One Health EJP after programme completion in September 2023. Some key instruments for the sustainability of the One Health EJP are identified, such as the [Med-Vet-Net Association](#) and European partnerships.

Publication of the SRIA ensures our legacy for a brighter One Health future in Europe, and beyond.
